Design Drawing are not provided for architectural or engineering work. This rendering is an artist's interpretation of the general appearance of the space. It is not intended to be a precise depiction. Please verify all dimensions prior to ordering materials or products for the project. Rev 4-21-2012.

Use the quick measuring guide below:  
Measure the width of your art and use the following ratios to determine the length of your picture light.  
 • for a frame 8 to 24 inches wide, use a 6 1/2 inch light.  
 • for a frame 25 to 36 inches wide, use a 5 1/2 inch light.  
 • for a frame 37 to 48 inches wide, use a 7 1/2 inch light.  
 • for a frame 49 to 60 inches wide, use a 14 1/2 to 16 inch light.  
 • for a frame more than 60 inches wide, find a 20 inch light.  
 or use a light 1/2 the size of the art.

*The key to successful design is space planning which allows for the development of traffic patterns, functionality and future furniture specification.*
